

The property of Disposable Microporous protective clothing coverall with with taping

White microporous coveralls will provide optimal protection in your wet or dry operational space. This protective apparel is designed and fabricated with an attached hood. Therefore, you will not need to purchase independent head protection gear for your workers.

The microporous fabric is an ideal choice because it will not be compromised by particulate matter or splashes of water-based liquids. In addition, the coveralls are lightweight and exceptionally breathable. Consequently, the apparel can be worn in high temperature workplaces without causing extreme discomfort to the user.
